The UNIVERSITY *of* OKLAHOMA

Data Bite Workshop

DATA BITE
A bit on Big Data

Hosted by: OU DALab

What is Data Bite?

The purpose of this workshop series is to provide the University community with basic data analytic skills and techniques that classes tend to overlook. Data Bite is student led and taught. These students seek to provide data analytics knowledge and tools that are accessible and useable in daily tasks.

Feedback

Very detailed and informative!

I want to improve my skills and add to my knowledge about the latest ML techniques out there. ML is a buzz words nowadays, so want to know more about it.

I need this course for my research!

Running the scripts in real time and seeing the visual outputs.
